Bolegg Gallery

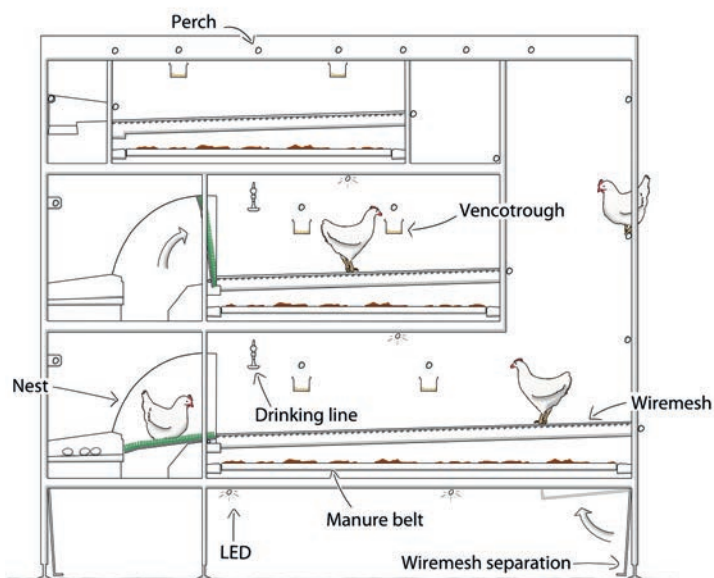

Has it all

Aviary system

The Bolegg Gallery is an aviary system offering comfort to both the bird and the poultry manager. The multi-tier system provides maximal living area, with easy accessible feed, water and nesting areas. The system follows the proven tree-concept, stimulating bird movement throughout the system. Birds find feed, water and nesting areas within one level.

The clever construction of the Bolegg Gallery optimizes labour efficiency. All 3 tiers are equipped with egg belts, enabling automatic collection of all eggs. The open structure allows easy inspection; winchable backwalls allow nest inspection and an internal walkway provides a good overview and access to all levels. Combined with easy operation of all processes, the Bolegg Gallery offers a controllable and easy to manage system.

- Easy management
- Efficient egg collection
- Prevents eggs remaining in the system
- A safe choice
- Maximises birds per house
